KÜCHEN

Living

in the kitchen.

Foreword

NOLTE KÜCHEN

Nolte Küchen is a German family company that has been in existence for over 60 years, and is now in the fourth generation. During this time, not only has the company continued to grow to become one of the most important brand manufacturers of fitted kitchens, but there have also been numerous innovations that have subsequently become the industry standard.

The experience and competence of our more than 3000 employees is a key factor in our success.

The kitchen is more than a business to us: it is our passion, and one that we cherish and develop every day anew. With our experience in international projects, we know we are the right partner for your ideas.

You can be sure we will always have the right solution for you, for any budget, room size and any design requirements. Challenge us - we look forward to your project!

HISTORY

Georg Nolte started manufacturing polishing disks in Rheda, North Germany

Georg
Nolte

1923

Konrad Nolte took over the company management in Rheda

Konrad
Nolte

1945

Nolte Küchen experienced a continuous upturn, and kitchens with more and more technical details came to the market

1960

Nolte Küchen continued to grow thanks to its highly varied programme range, and by this time offered 300 different types of cabinets

1980-1990

1932

The production of living and bedrooms began in a small furniture factory in Delbürk

1958

The Nolte Küchen company is founded with 70 members of staff on a production space of 5,000 sq.m

1970

Nolte Küchen was offering 25 different kitchen designs with various fronts. The company become increasingly popular, which increased its production facilities and led to the purchase of a piece of land in Melle

The number of staff increased to 900, and one of the most modern logistics centres in Germany was built in Melle

1994

SEALED EDGE:
For less dust inside the cabinet and gently closing drawers and doors

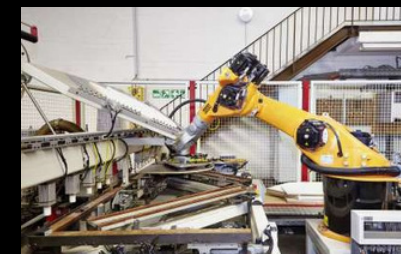

2001

INTERIOR DECOR: Perfect inside and outside: the carcass interior colour corresponds to the carcass exterior colour on all furniture types

2004

The use of the art technology in production results in automation and enhanced qualification. Processing fronts, worktops, cupboards and finishing of surfaces and edges is optimized by fully automated, computer operated machines

2013

2000

Nolte Küchen launched the innovative drawer system ComfortLine for loads up to 80kg on the market

2003

PLANNING DEPTH 75 CM: The planning depth of 75 cm gives you on extra 32% more storage space, while needing only an additional 15 cm at the wall

2008

Matrix 150 is a grid system introduced exclusively by Nolte Küchen which is based on a very simple and easy-to follow logic: all heights, widths and even the depths can be divided by 150mm. To this day, it remains the only 3-dimensional grid on the market

The innovative carcass height of Matrix 900 makes the transition to the living area even more seamless: the very narrow plinth not only provides an ideal working height with 20% more storage space than the standard, but also creates a totally new kitchen look

20% more storage space is also possible without handles, and makes the kitchen even more graphic and sleek. The Nolte PremiumLine drawer and pull-out provides perfectly organised access to cutlery, and provisions with a unit width of up to 120 cm

Nolte Küchen's over 1,000 members of staff produce around 850 kitchens on more than 100,000 sq.m. of Löhne und Melle everyday. Our kitchens are exported to more than 60 countries all over the world

We live RESPONSIBILITY

For years, sustainability and resource-saving, environmentally-aware action have been our declared corporate goal. We are constantly working on optimising the ecological balance of our entire process chain. From minimising the emissions of harmful substances and the use of environmentally-friendly, recyclable materials to resource-saving deliveries, ecology is at the heart of everything we do. Our environmental commitment has also received recognition in the form of certifications and test seals in every important area.

QUALITY SPEAKS FOR ITSELF

Quality is often not apparent at first sight but hidden in the details. They make all the difference between a kitchen and a Nolte kitchen. But what really counts is the individual: our ideas and requirements change. And with them, our kitchens. They keep pace with growing expectations. What's more: they meet tomorrow's demands even today. But these things you can be sure of at Nolte Küchen: perfect quality and perfect manufacture down to the tiniest detail, whether you are managing a major international project or planning the kitchen for your own home.

Quality made in
Germany

Awards

Nolte kitchens are created on a production site measuring around 100,000 m² in Löhne and Melle.

Our quality promise "Made in Germany" is part of our global success. Nolte Küchen has been voted Germany's favourite kitchen brand.

Competence Centre **Nolte FZE**

STRENGTH IN NUMBERS

Nolte FZE is a fully integrated competence center in Dubai, United Arab Emirates. The hub is responsible for distributing over 60,000 project kitchens and over 25,000 retail kitchens. The competence center exports to over 25 countries in the Middle East, Africa and South-East Asia and operates over 75 branded showrooms.

Our SERVICES

Since our inception in 2011, Nolte FZE has supported our partners in all aspects of brand expansion and export processes.

BUSINESS DEVELOPMENT

Through business development and training, a dedicated international manager supports their respective country partners in all aspects of retail and project sales.

SALES ORDER PROCESSING & DESIGN

We help our country partners with their sales processes. We provide kitchen design, production, space planning, and showroom design in addition to project design and planning.

MARKETING & BRAND COMMUNICATION

Our team is responsible for expanding the Nolte brand across the Middle East, Africa, the South-East, and Far East Asia. Strategic marketing, customer service, and brand communication are all areas where we focus.

FINANCE & ADMINISTRATION

Budgeting, billing, sales planning and business documentation, international event management, and business travel are areas where our finance and administrative team supports our country partners.

TRAINING & DEVELOPMENT

Our showrooms are fully-equipped with interior designers and technical specialists who have received continuous training and have the experience and expertise to deliver great kitchen, bathroom, and home solution design advice.

LOGISTICS MANAGEMENT & SUPPORT

We support Nolte partners with logistics, pre & post-shipment coordination, and other support activities between their countries and our factories in Germany. We can also assist with documentation for logistical purposes.

Why choose **NOLTE?**

Nolte has nearly a century of expertise. Creating industry leading innovation through quality and attention to detail, we have a proven track record of success from the smallest retail designs to large scale projects.

Beyond the kitchen, we produce high-quality designs for the home from bathrooms to utility spaces to living areas and beyond.

Nolte Küchen caters to every design need with additional ranges to suit a wide variety of styles and finishes.

nolte
KÜCHEN

Nolte LIVING

Design a home with Nolte LIVING for living room and dining areas. With the quality, innovation and options Nolte Küchen is known for, the collection carries our entire product range with useful and practical additions for every home.

Nolte SPA

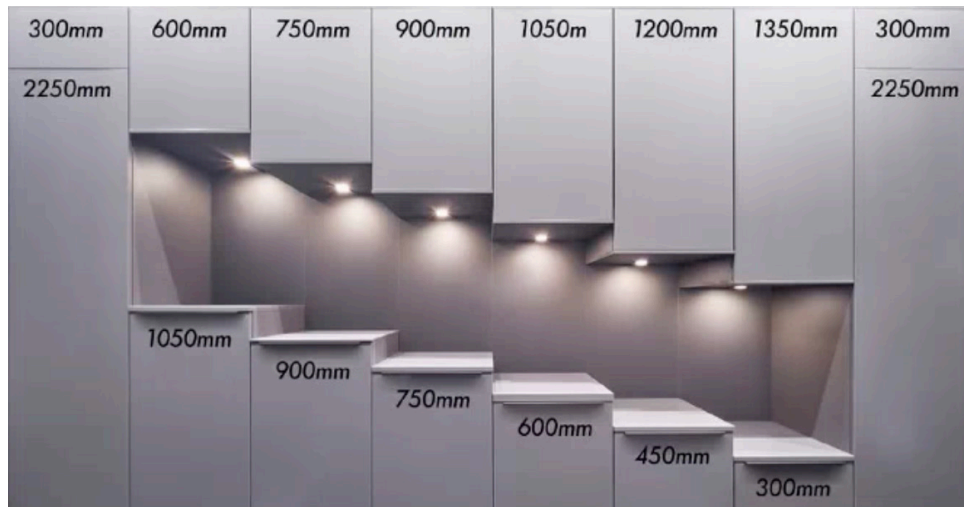

Today, the modern bathroom is a comfort zone, a retreat and even a haven for well-being. Nolte SPA makes it possible to create a personal world to pamper the senses.

Nolte UTILITY

A space for everything. Storage capacities are maximized with Nolte UTILITY, creating efficient areas for every part of the home including utility spaces.

Design & TECHNOLOGY

Coordinated Interior Decor

Nolte kitchens look the same inside and out. This means that you will find the carcass decors on the inside as well as on the outside of the cabinet. An added value that we provide as standard.

Ergonomical Cabinets and Pull Outs

With Matrix150, regular increments of 150 mm result in a perfect joint pattern with consistent lines.

Material Selections

Thirty front ranges, 183 front colour variants, 15 carcass colours, 46 worktop decors and 81 handles - we have a tremendous selection of styles, colors, finishes and materials for you so you can be sure of finding just what you are looking for.

Load Bearing Capacity

Built to last, Nolte Küchen cabinets come equipped with a maximum load-bearing capacity up to 80 kg.

Lighting & Accessories

Create an atmospheric ambiance. Choose different colours or use Emotion Light, an LED-based dimmable lighting system, to add accents and change smoothly between warm and cold light.

Multimedia

Nolte creates moments for entertainment right in your kitchen.

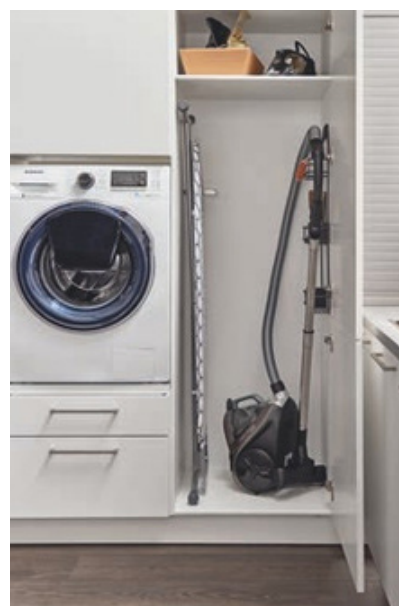

Utility ROOM

Everything stored next to the kitchen

A utility room not only perfectly complements modern, design-focused kitchens, but it also gives the entire household a clearer and more practically organised structure.

Because it is efficiently concentrated, it provides a place for everything that is important and necessary for everyday housekeeping. From washing machine, tumble dryer, ironing board, provisions, cleaning products and equipment to coat rack and recycling system. This way, a utility room eases strain on the rest of available living space. And creates space for the things that matter: the freedom to enjoy a relaxed life.

With intelligent solutions such as the laundry organising cupboard or the appliance base unit for the washing machine, the utility room is easily tailored to customer's individual desires.

Coat rack and hanging cupboard in the entrance area?
That to is Nolte Küchen!

Appliance housing base unit

- Model code GGWA....

Storage organised TO PERFECTION

A place for everything

Besides an appealing look, high-quality accessories, generous storage space and carefully considered details, the interior is also incredibly important when planning a kitchen. This is an area where Nolte Küchen has a wide range of products for you. Drawers and pull-outs are perfectly structured for your customers.

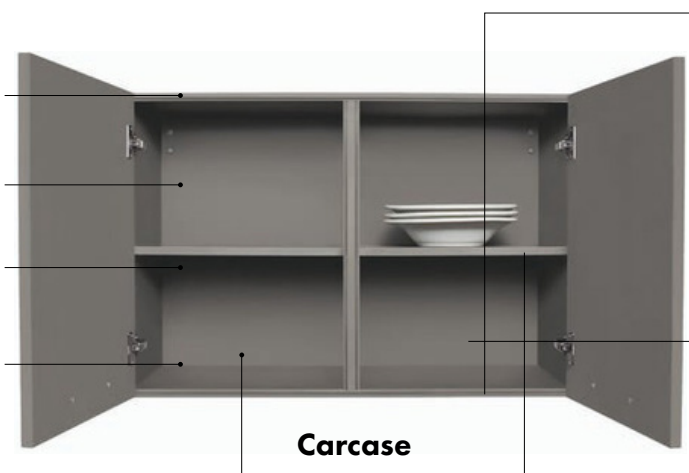

The right options for everyone

Your customers have the choice: Nolte Küchen offers a wide variety of solutions, from a basic configuration to an elegant real wood version.

You determine the interior organisation of the drawers and pull-outs just as your customers want them. Look forward to the many options - the right interior for any cabinet.

Carcase and PLINTH

Multiple rawl plug connections

Exclusive 3-layer structure, 16 mm thick

Melamine resin coating on both sides

64 mm drill grid for insert shelves

Carcase

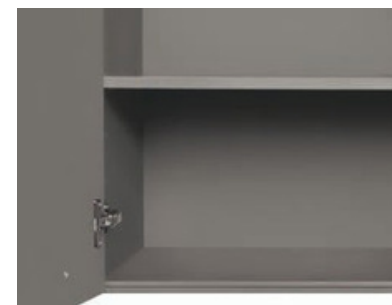

Back panel HDF, 3 mm thick

- brought forward by 42.5 mm on base and wall units
- brought forward by 19.5 mm on wall and dresser units

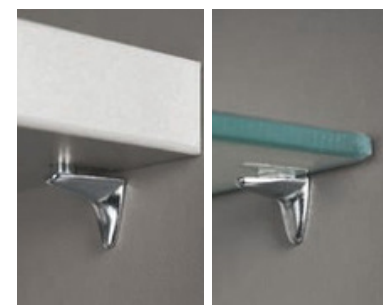

Sealed edge

- Carcase front edge with matching PP sealed edge
- Matching profiled seal
- Reduces the dust accumulated inside the cabinet
- Doors and drawers close quietly

Interior decor

- The carcass interior colour corresponds to the carcass exterior colour as standard for all models
- Delivery at no additional charge

Adjustable shelves / glass shelves

- Adjustable shelves with PP thick edge at the front
- All metal shelf supports
- Shelf supports for shelves with pins for secure fixing of the adjustable shelf
- Shelf supports for glass shelves with rubber coating
- Adjustable shelves (16 mm) have a load-bearing capacity of 15 kg
- Glass shelves (5/8 mm) have a load-bearing capacity of 10 kg

Plinth panel & installation tool

- Per unit, at least four adapters firmly connected to the carcass to receive the plinth feet
- Standard plinth heights of 50, 70, 90, 120, 150 and 170 mm
- Plinth heights of 60 to 300 mm possible at an additional charge
- From plinth height 120 mm, plinth drawers and large-capacity pull drawers can be planned

- High quality 3-layer structure, 12 mm thick
- Direct coating on a melamine resin base, optionally veneered or lacquered
- Join with floor by 5 mm thick PP sealing profile, waterproof
- The plinth panel is firmly pressed on to the floor by means of catch elements
- Easily fitted and removed for cleaning
- Installation tool available as an accessory

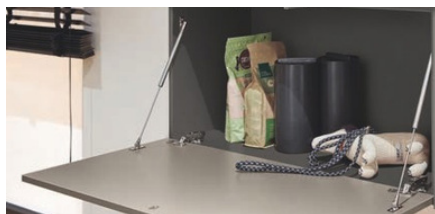

Hinges and FITTINGS

Flap door/lift-up door fittings

- With cushioning as standard
- Illustration on left for flap door units HK... also available with PUSH-TO-OPEN
- Illustration on right for cabinets with lift-up door also available with electric door opening
- Toolless rapid installation/removal of the fronts

Bar flap door fitting

- Also available with PUSH-TO-OPEN
- Tool-free fast installation/removal of the flap doors
- Maximum load on bar flap 5 kg

Pivoting/folding flap door fittings

- With cushioning as standard
- Illustration left for pivating flap door units HL...
- Illustration right for folding flap door units HFK...
- Also available with electrical door opening
- Tool-free fast installation / removal of the flap doors

Wall unit fitting

- Concealed all-metal hanger, can be adjusted in three dimensions
- Integrated safety catch
- 3 metal pins are firmly attached to the carcass
- Cover caps for a clean look in the unit interiors
- Metal hanging strip including dowels and special screws
- Load per wall unit up to 65 kg

Hinge with cushioning

- With integrated cushioning element
- Standard in every commission- no additional charge
- All-metal finish, can be adjusted in three directions
- Quick installation / removal of doors without tools
- Opening angle 110°

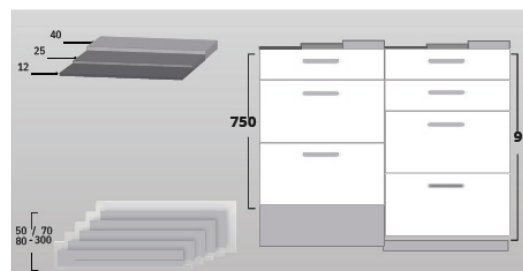

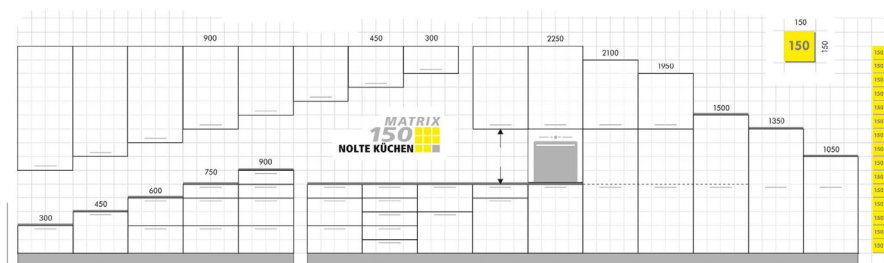

Heavy-duty hanging fitting

- Version in full metal, can be adjusted in three dimensions
- Cover cap for a dean look in the unit interiors
- Fitted securely attached to the carcass by means of metal dowels and screw connections
- Metal mounting plate with integrated safety catch
- Load per wall unit up to 90 kg (cabinets with pull-out elements: 30 kg)

Matrix 150

SIMPLE. PRACTICAL. GOOD.

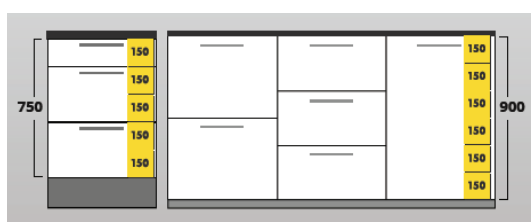

Carefully balanced lines – easy to configure!

Simple, logical and clear: Matrix 150 is a grid system introduced exclusively.

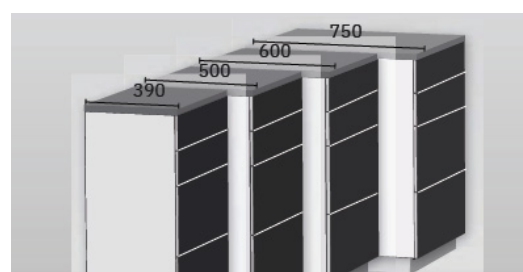

It is based on a very simple and easy-to-follow dimensioning logic in which all widths, heights and, in some cases even depths, can be divided by 150 mm.

For you, this means Matrix 150 pays off in every respect – from simplicity of planning right through to the big selling point of storage capacity.

Geared to practice

Whether 750 mm or 900 mm carcass height, the work surface is always at the optimum level thanks to the combination of variable plinth and carafe.

Utmost planning variety

For every individual wish in all room situations:

- 5 base unit heights
- 8 wall unit heights
- 6 tall unit heights
- 4 base unit heights
- 3 worktop thicknesses
- Variable plinth heights

Ideal for built-in appliances

The grid system makes it easy to integrate all oven brands in the standard 600 mm size for a perfect look – without any filler panels to spoil the overall impression.

Matrix900

THE EXTRA-HIGH CARCASE

The combination of 12 mm thick worktops and the plinth height of 50 mm makes the kitchen look like much more than just domestic furniture, and in open-plan kitchens in particular create an entirely new effect.

Matrix900 — the designer carcass that maximises storage space

The carcass height Matrix900 means the optimum combination of design and ergonomics.

On the one hand, Matrix 900 achieves entirely new kitchen looks, while on the other hand the working height of 962 mm (in conjunction with a 12 mm worktop and 50 mm plinth) is ergonomically ideal. In small kitchens in particular, the additional storage space gained over the standard carcass size of 750 mm is above average significance.

MatrixArt THE HANDLELESS KITCHEN

MATRIXART 900
BY NOLTE KÜCHEN

MATRIXART
BY NOLTE KÜCHEN

Whether elegant, extravagant or comfortable, plan your kitchen in a graphic and sophisticated design language with MATRIXART, the handleless kitchen by Nolte Küchen.

The 12 mm thick worktop underscores the lightness of the lines. The handleless kitchen is now also available in carcass height 900 mm. And it is all based on the familiar MATRIX150 size grid.

CERTIFICATIONS

Our kitchen ranges are subject to permanent monitoring by neutral accredited German test institutes, and comply with all furniture-related DIN standards. Our furniture also complies with the higher standards of the German Furniture Quality Assurance Association (DGM) for safety, durability and emission requirements for kitchen furniture to RAL GZ 430-2.

GS test seals

Our kitchens not only undergo internal quality testing, but are also checked by an independent centre. Every five years, all our series and products are tested by TÜV Rhineland for confirmation of their quality and safety to the standards of the German production safety law. You can use the identification number that is included in the logo to obtain further information from the TÜV Rhineland certificates database.

Quality management system

The management system to DIN EN ISO 9001 confirms the efficiency of our quality management, and assures our product and service quality. The seal stands for well-designed work sequences, which we have optimized specifically to the development and manufacture of kitchens and the marketing of the same.

An energy management system to DIN EN ISO 50001 is a proven effective instrument for increasing a company's energy efficiency and so reducing energy consumption and CO2 emissions.

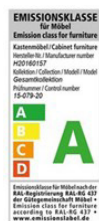

Golden M

The "Golden M" is an RAL quality seal that is issued by the German Furniture Quality Association (DGM). Manufacturers and furniture are tested by independent experts, the standards are extremely high, and the tests are extensive. On the one hand the quality of the furniture is assessed particularly on durability and stability. On the other hand it is also about the safety, health and environmental aspects that guarantee a healthy home. Only companies that fulfill all the stringent criteria without any gaps are certified. This makes the "Golden M" one of the most important seals there is.

Made in Germany

The label "Furniture made in Germany to RAL-RG 0191" is proof and confirmation that the construction, manufacturing process and the testing of the product quality all took place in Germany. The RAL seal stands for reliable quality, and is monitored by the German Furniture Quality Assurance Association (DGM).

DGM emissions label (RAL-RG 437)

Our furniture is all rated A, the highest emissions class. This allows us to be sure that our kitchens do not produce any emissions of substances that are harmful to health.

100% green electricity with Renewable PLUS

A certificate confirms the origin of the electricity as being from renewable energies and produced on behalf of energies Vertrieb Deutschland EVD GmbH for Nolte Küchen. The electricity from renewable energy sources is fed into the European integrated grid. The electricity generation is confirmed by certificates of origin that are recorded in the register of origin held by the Federal Environment Agency. For us this is another important contribution towards sustainable action.

Climate-neutral company (RAL-GZ 435)

Nolte Küchen was named a "Climate-friendly furniture manufacturer by the DGM. The aim of the climate pact is to account for, reduce and neutralise CO2 emissions. Compensation for CO2 emissions is made by the acquisition of climate protection certificates with which we support a reforestation project in Uruguay.

Climate pact for the furniture industry

In the context of the rapidly advancing global climate change and the associated massive impacts on man and nature, the German Furniture Quality Association (DGM) supports the UN's 1.5 degree target.

Alliance for Development and Climate

The objective of the Alliance for Development and Climate is to link development cooperation and international climate protection through the instrument of voluntary offsetting of greenhouse gases and the mobilisation of additional funds for the financing of important development and climate protection projects in developing and emerging countries.

FSC® and PEFC™

We were one of the first companies in our industry to be certified to FSC® and PEFC™. FSC® certification stands for responsible forestry based on ecological criteria such as biodiversity and landscape conservation as well as social aspects, such as protecting the rights of indigenous populations. PEFC™ stands for the promotion of close-to-nature and sustainable forest management.

Products that bear the logo originate from certified companies or have successfully completed a certification chain.

ALL OPTIONS AT A GLANCE

This is where you can quickly find your way about all available options: the next few pages show you our wide range of fronts that are manufactured in line with the innovative Matrix 150 grid system and can feature any handle you choose – all clearly structured by price group.

LAMINATE

A high-quality, soft mat and extremely hard-wearing laminate surface with anti-fingerprint properties.

LACQUERED LAMINATE

An extremely calm looking surface and optimum durability are characteristic of lacquered laminate. The fronts are made from an engineered wood panel with a lining lacquered in the course of the production process. High gloss or soft mat, just as you choose.

GENUINE LACQUER

High-gloss genuine lacquer fronts are lacquered in several coats and then polished to produce a sealed and particularly smooth surface. Besides high-gloss fronts, fronts are also available with a soft mat genuine lacquer finish. The latter captivates with its interesting feel.

GENUINE GLASS

Genuine glass fronts – luxurious and homely. Coated with adhesive throughout, a back-lacquered pane of toughened safety glass is bonded to the high-quality substrate material. The extremely hard-wearing glass front gives the kitchen a modern transparency and feeling of space.

REAL WOOD

As an authentic and genuine natural product, wood conveys warmth and a sense of security. The natural variations in colour and texture visible in the grain are an inherent part of wood. Used in the kitchen, the natural material lends itself to quality craftsmanship while conveying its charm and character.

REAL METAL

The real metal fronts give your kitchen an authenticity that oozes with character: several layers of a mixture of metal particles, resins and colour are applied to a base panel made of engineered wood and sealed with clear lacquer. The result additionally impresses with a magnetic effect.

REAL CEMENT

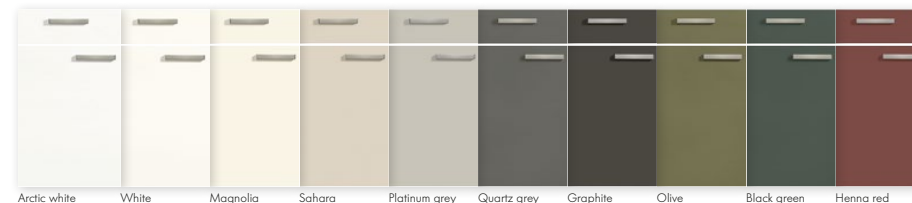

The unusual feel of this surface is produced by creating irregular depressions in a panel made of engineered wood. It is then hand-coated with cement, silica and coloured lacquer and afterwards additionally sealed with clear varnish. Robust beauty for combinations so very rich in contrast.

REAL STONE

Stone is a pure, genuine natural material that radiates stability and durability. Natural variations in color and texture are unmistakable features. The surface made from a quartz-dolomite mixture creates a slightly rough texture that emphasizes the exceptional character of this material.

Bespoke **Customization**

As the undisputed market leader in both quantity and quality delivered year after year, we are keenly attuned to the unique needs of the project market. We meticulously analyze these needs to ensure that our products align seamlessly with our customers' expectations.

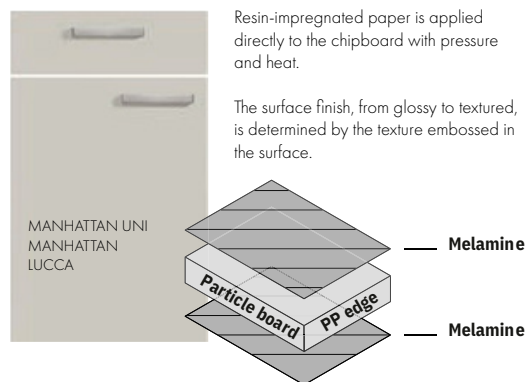

In our commitment to excellence, we proudly offer bespoke customization options, empowering our customers to elevate their design visions to new heights. With our flexible approach to color, material, and special size cabinet customizations, we provide the tools necessary to bring even the most ambitious designs to life.

At Nolte Küchen, we don't just meet expectations -- we exceed them, setting the standard for innovation and customer satisfaction in the industry.

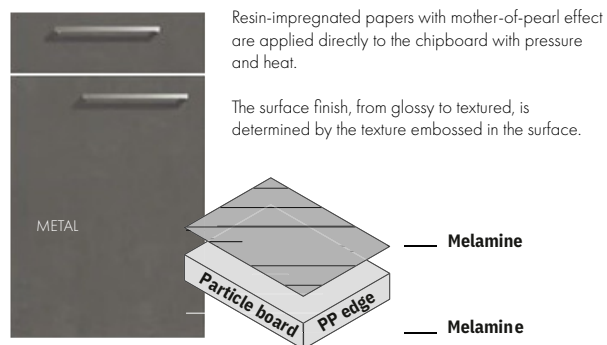

Material Systems FRONT

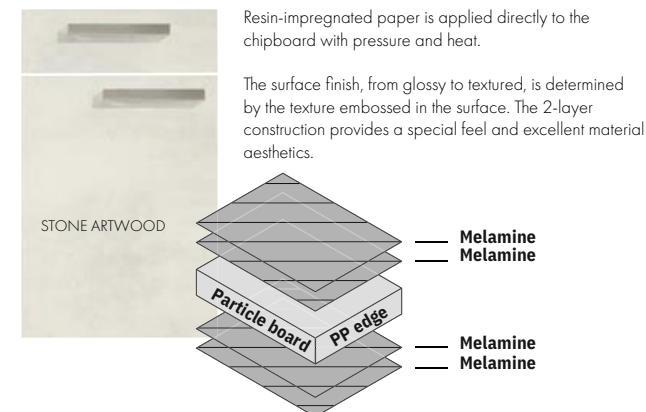

Mat melamine resin

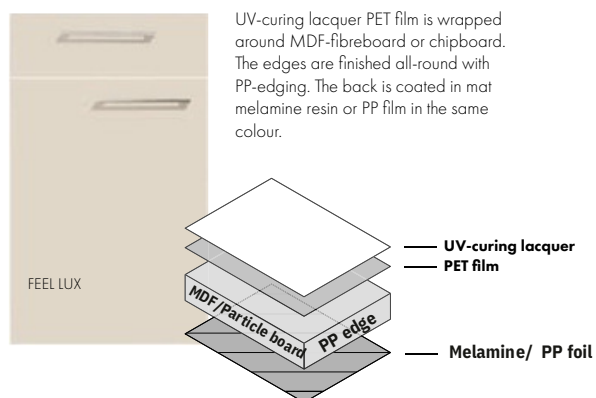

Melamine resin, gloss / melamine resin, mat

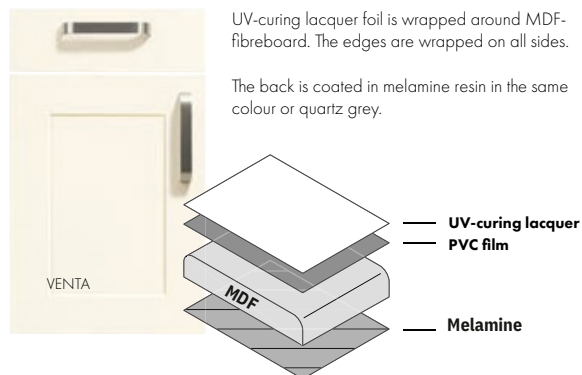

Mat melamine resin

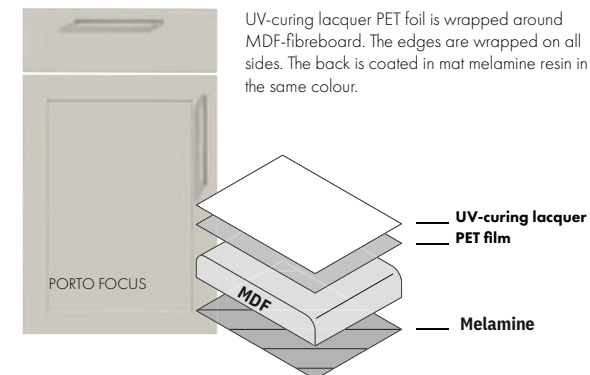

Lacquered laminate, high-gloss/lacquered laminate, soft mat

3D lacquered laminate

3D lacquered laminate, soft mat

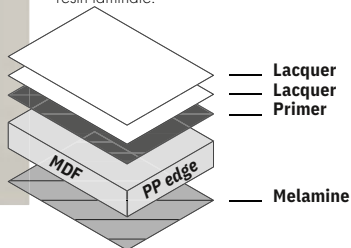

Genuine high-gloss lacquer

An MDF-fibreboard panel is primed and then finished with several layers of a high-gloss lacquer.

The edges are finished on all sides with high-gloss PP edging. The back is in the same colour as the melamine resin laminate.

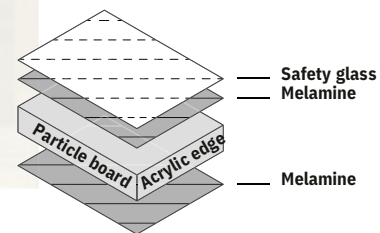

Glass

The carrier plate is chipboard with back-painted safety glass glued to both sides.

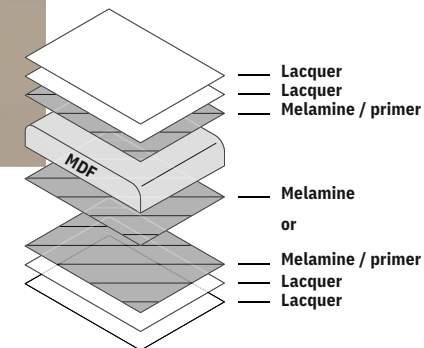

The front has acrylic edging on all sides.

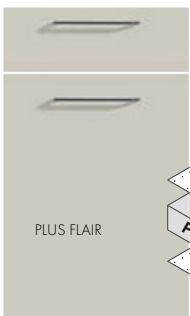

Genuine lacquer, high-gloss / soft mat

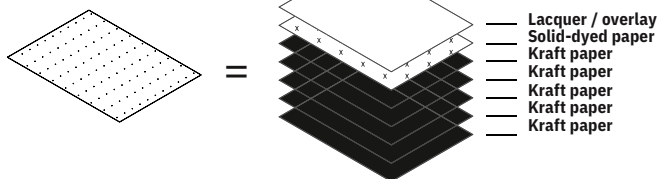

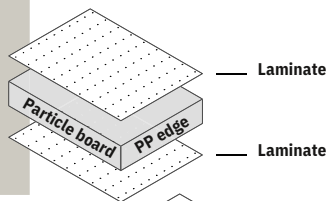

The carrier plate consists of MDF-fibreboard and primer paper. The front and all the edges owe their high-quality surface to the multi-layer lacquered coating. The back is coated in mat melamine resin or lacquered in the same colour.

Soft-mat laminate

A coating of compressed resin-impregnated paper which is laminated onto chipboard. The mat laminate surface is lacquered / overlaid to give it an anti-fingerprint finish which makes fingerprints on the front practically invisible.

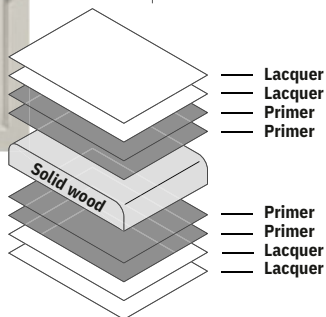

Wood / Veneer / Genuine lacquer, soft mat

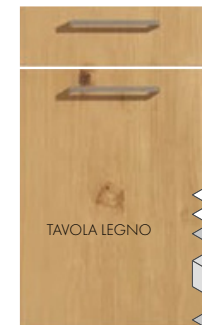

The raw material for drawer fronts and frames is made from solid ash. The base material for the centre panels is MDF fibreboard with an ash veneer on both sides. Frame and centre panel are brushed on the front.

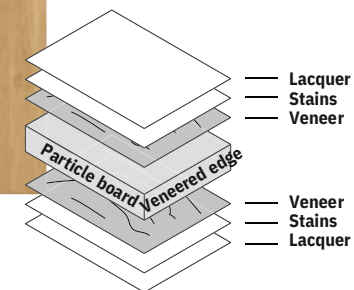

Fronts and backs including the edges are double primed. The high-quality finish of the fronts is the result of the application of several layers of coloured lacquer.

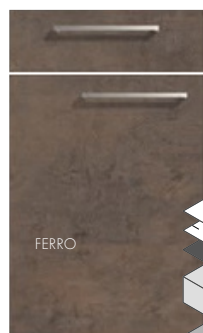

Wood / Veneer

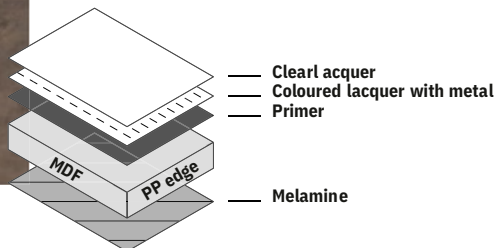

Naturally growing raw material that retains its natural beauty and individuality through the highly resistant acquer.

Metal

Primed first, an MDF substrate panel is provided with several layers of a mixture of metal particles, resins and paint. The surface is then sealed with clear lacquer. The edges are given an all-round PP edge in the same decor, with the rear surface of the front panel being finished in quartz grey melamine resin.

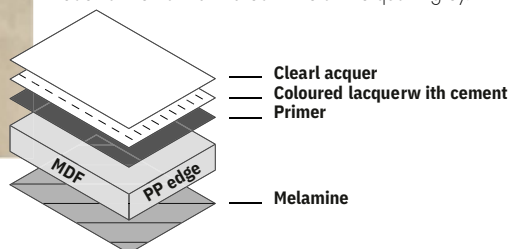

Cement

MDF-fibreboard is primed and then embossed with irregular indentations. After that, 2 coats consisting of cement, silica and coloured lacquer are applied by hand. The surface is then sealed with a clear lacquer.

The edges are given an all-round PP edge in the same decor, and the back of the front is finished in melamine quartz grey.

The materials METAL, CEMENT AND WOOD/VENEER are genuine materials or natural products. In combination with the manufacturing methods used, there may be minor variations in colour and/or differences in structure and surface condition, which are evidence that these are genuine products, and are not a cause for complaint.

For further information, please refer to the pages on the fronts.

PP edges

PP (polypropylene) is one of the most ecological thermoplastic materials there is, with excellent material and processing properties.

PP edges have greater chemical resistance and sustainability than any other edge material.

PERFECT BOTH INSIDE AND OUT – OUR CARCASE DECORS

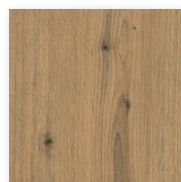

Whichever of our kitchens you choose: it's only perfect when it also meets the highest quality standards on the inside too. This is why the carcasses of every kitchen we make come with the same finish on the inside as they do on the outside to ensure an overall look of consistency – not only for wood hues but for all plain colours too.

What impresses you at first sight will continue to excite you in every-day use: harmony and perfection carried through on the inside.

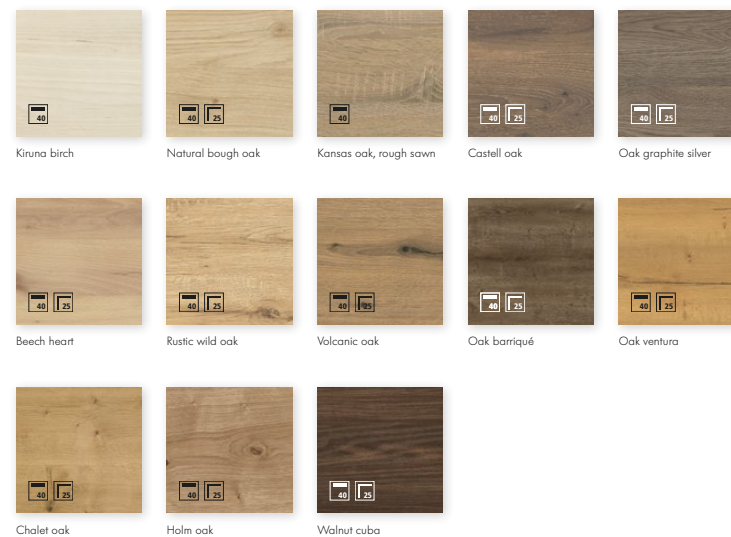

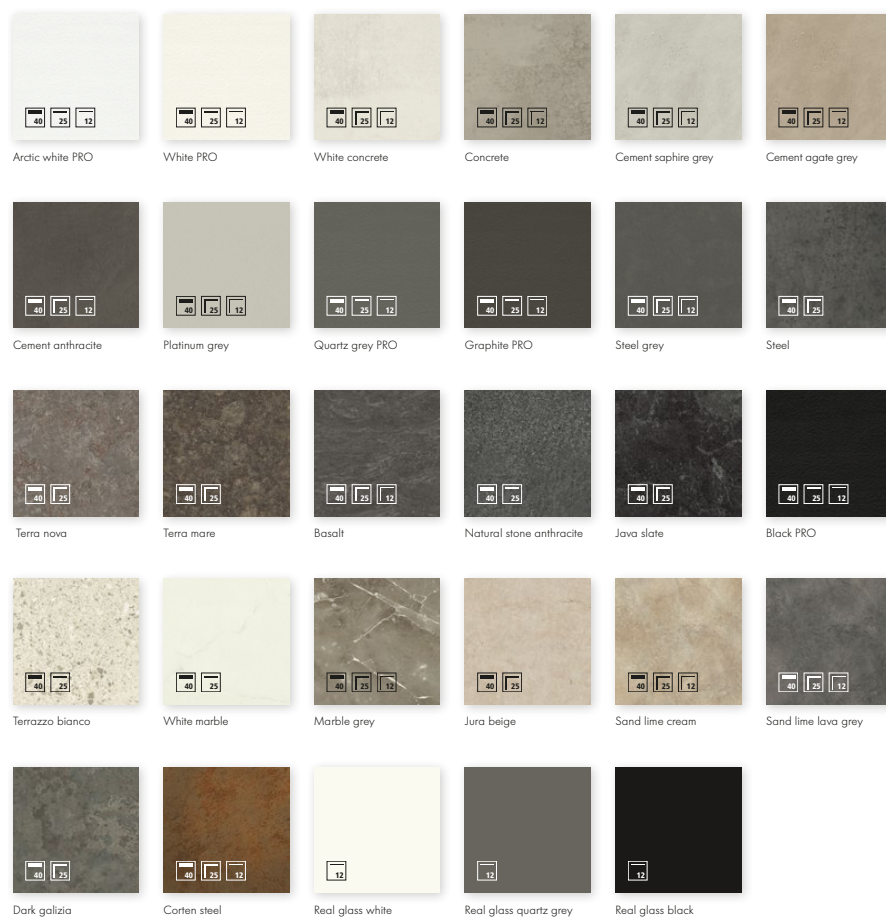

SEALED IS WELL SEALED

With Nolte Küchen, you can take this quite literally: doors with edge seals close so perfectly that hardly any dust gets inside the cabinet.

NATURAL CHARM OR COOL ELEGANCE – WORKTOPS IN STONE LOOK, PLAIN COLOURED OR IN WOOD EFFECT

Once the quality is right, it's a matter of design. For our worktops, this means: the choice is entirely yours. Clear plain colours lend the kitchen elegance, with a realistic stone look giving the entire room structure. Anyone preferring a warm and homely environment in the kitchen sooner or later realises there is no way past a worktop in wood effect. Choose from a wide range of decors to suit your taste, and all of course in a high-quality finish to meet your exacting expectations on design.

nolte**neo.**

Integrated, one-of-a-kind solutions tailored to specific design needs are possible with nolteneo.

WHAT IS nolte**neo**?

Clean, purist lines. Exclusive fronts and fascinating details. Colours and materials that enter a harmonious dialogue and are in balance with practical design. A nolte**neo** kitchen makes spaces into a statement, and is an expression of individuality and freedom of choice. From a wide range of planning options to exclusive fronts and design elements, nolte**neo** opens up entirely new dimensions in individualisation.

DESIGNER ELEMENTS FROM nolte**neo**

MatrixArt ONE

is the design-focused, handleless kitchen: just one single handle trim profile below the worktop – which, of course, can be illuminated too, creates a particularly neat and graphic look. The top-most front is opened by the handle trim profile, the ones below by the PUSH-TO-OPEN assisted opening function.

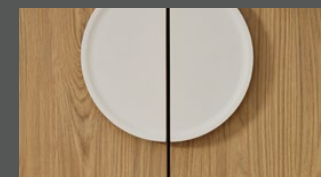

SHADOW REVEAL

Graphic and different – the 12 mm shadow reveal between front and side panel creates a completely new contour that adds a stylish designer element to every kitchen.

MatrixZERO

perfectly complements the new shadow reveal. In conjunction with the neoBOX, PUSH-TO-OPEN for drawers and pull-outs gives you yet a further option for designing your handleless kitchen.

DESIGNER HANDLE

Above all, nolte**neo** is synonymous with the many ways of individualising a kitchen. Characteristic of this are exclusive nolte**neo** products such as the large, semi-circular handles which, although discreetly understated in this kitchen, make stylish eye-catchers.

MatrixZERO

MatrixZERO

PURISTIC STATEMENT

neoLEAF in golden oak is a dream come true for lovers of kitchens with a continuous wood look. The new decor has a subtle grain structure, which you can hardly tell apart from genuine wood because of the synchronous pore finish. Matching panels and worktops further enhance the puristic appearance in this MatrixZERO design. The eye is drawn to the light grey worktop, which runs through the whole island as a visual divider and becomes a table. Design handles pick up the colour while protruding panels render a special touch to the sideboard in the living area.

neoLEAF Golden oak

neoLEAF 842 - Golden oak • Carcase GTD - Graphite
Worktop - Ceramic (provided by the customer) / E45 - Golden oak
End panels GOE - Golden oak • MatrixZERO • neoBOX - PUSH

DISTINCTIVE CROSSOVER

When the country-home atmosphere of a chalet is supposed to meet the industrial style, it is time for you to introduce neoNATURE. Knots and a thick veneer with an embossed surface are the characteristics of the new front in Oak Cottage, which we have combined here to great effect with FRAME LACK in black soft mat. To make the contrast even stronger, neoGRID works well as a design element between the wooden fronts. Two worlds unite in a kitchen with substance and an unmistakable charm, guaranteed to leave a lasting impression.

neoNATURE Oak cottage FRAME LACK Black soft mat

neoNATURE 633 - Oak cottage • FRAME LACK A18 - Black soft mat

End panels LMZ - Lacquer, black soft mat • MatrixZERO • neoBOX - PUSH

MatrixZERO

MIRRORED STORAGE SPACE

Using continuous, handle-free mirror door fronts **neoMIRROR** on large units lets you achieve two things at once: you skilfully hide the storage space behind them whilst making the room itself look bigger, thus also making said units appear less massive. The light, cool mirror surface is an ideal match for **SOFT LACK** and new warm shade sepia brown soft mat. The minimalist appearance of MatrixZERO makes a feature of the practical combination of units and table top and the new lowboards from the Living range, shown with a **nolteneo** plinth rack.

SOFT LACK Sepia brown soft mat
neoMIRROR mirror

SOFT LACK 76U - Sepia brown soft mat • **neoMIRROR 905** - Mirror
Carcase GTD - Graphite / PWD - White • Worktop S04 - Jura beige
End panels LMU lacquer, sepia brown soft mat • MatrixZERO • **neoBOX** - PUSH

COMMUNICATIVE CENTRE

If there are two variants for the new ARTLINE range at entry-level price point then, of course, you also need the respective extension for **neoLODGE**! Oak diamond is the name of the light, fluted veneer that gives this kitchen its distinct character. Combining **GLAS TEC SATIN** in white results in a modern mix of materials with glass and wood. Through the absence of wall units, the island becomes the main element in this design. By way of reducing to the essentials, cooking and communication take centre stage. Minimalists will be delighted!

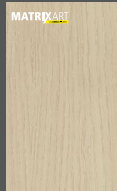

neoLODGE Oak diamond, fluted
GLAS TEC SATIN White

neoLODGE 664 - Oak diamond, fluted • **GLAS TEC SATIN 17W** - White
Carcase GTD - Graphite / PWD - White • Worktop G59 - Real glass, white

We have extended the product range in the programmes WIN, BASE, STAR, MOON and GLOSS with SYSTEMLINE as an elegantly designed handleless version.

Three horizontal, C and L-finger pulls in combination with highboard height 1500 mm and tall unit heights 1950 and 2100 mm give your kitchen a particularly elegant flair. Vertical finger pulls are also available in all highboard and tall unit heights. We offer the finger pulls in a stainless steel look, black or white, and the L-finger pulls under the work top can also be illuminated as an option.

SYSTEMLINE®

CERTIFICATIONS

The “certified safety” seal ensures that our products fulfill the quality and safety standards of 21 of the German Produktsicherheitsgesetzes (ProdSg) / Product Safety Act

Our company is re-certified to DIN ISO EN 9001:2015

This means that our quality management fulfills all the requirements for customer orientation, and for product and service quality. This award is therefore the expression of our process of continuous improvement.

Our company fulfils the quality and testing regulations RAL-GZ 430. The “Golden M” stands for tested quality, guaranteed safety and healthy living.

Every step is important. Protecting and conserving the environment.

For us, it is not only the quality, design and functionality of our kitchens that matters. Tremendous importance is also attached to protecting the environment. This all starts with the way in which our derived timber products are sourced and continues through to production and logistics. The circle then closes when we dispose of our timber waste in compliance with the law for recycling to generate heat. We have held both PEFC and FSC certification for many years. As such, we are the very first German kitchen manufacturer to have been given both certificates for sustainable, responsible forest management. You may be wondering what these certificates mean. Putting it in a nutshell, you could say: our derived timber products are sourced under fair conditions -- fair to mankind and also to nature. Areas of forest worthy of protection are taboo for us, in just the same way as forests turned into plantations on a grand scale, genetically modified crops or illegal deforestation.

Finalizing A PROJECT

1. Tendering and Value Engineering

Nolte assists project managers with the submission and presentation of tenders. Interior designers collaborate with business development managers and assist in the selection process.

2. Space Planning and Design

Understanding that each space requires unique planning is a significant element for which Nolte stands out. The fulcrum of design planning is an analysis of the customer's needs and budget. We work collaboratively with the project managers during this phase to interpret the specifications and apply the proposed budget.

3. Product Orders and Logistics Support

When a project order is received, coordination between the team and factories in Germany begins to ensure that there is no delay in shipping while also providing logistics support.

4. Installation and Project Handover

The trained technical team is responsible for the installation following guidelines and specifications. Then the project is prepared for inspection and handover to the project manager.

Nolte FZE and our partners have delivered 65,000 kitchens in over 350 prestigious projects with varied design needs.
